EDUCATION

Kasetsart University **Bangkok, Thailand**
Bachelor of Engineering in Computer Engineering
GPA: 3.56/4.00 (First-class Honors)

SUMMARY

Software Engineer with hands-on experience in cloud-native systems, GitOps, and microservices architecture. Experienced in migrating on-premise services to Kubernetes, refactoring monolithic systems into microservices, and implementing CI/CD pipelines for production environments.Interested in building scalable and reliable systems.

WORK EXPERIENCE

Gofive Co., Ltd **Bangkok, Thailand**
Software Engineer *May 2025 - Present*

- Designed and implemented a **GitOps-based deployment model** using ArgoCD to manage multiple applications at scale.
- Led the migration of legacy on-premise services to **Azure Kubernetes Service (AKS)**, improving scalability, deployment consistency, and operational reliability.
- Re-architected a **monolithic E-Tax system into microservices**, enabling independent deployments and improved maintainability.
- Improved inter-service communication by migrating from **REST to gRPC**, reducing latency.
- Conducted load testing on critical APIs to evaluate system performance,identify bottlenecks, and validate service scalability under high traffic.
- Developed a **GitHub App integrated with Semgrep CLI** to automate pull request security scanning, strengthening DevSecOps practices.
- Conducted internal knowledge-sharing sessions on **GitOps** and **Semgrep CLI**.
- **Utilized**: Kubernetes, Argo CD, Azure, Ansible, GitHub Actions, gRPC, Angular, C#, .NET, k6 and Docker

Appsynth Asia Co., Ltd **Bangkok, Thailand**
Full-Stack Developer Intern *April 2024 - October 2024*

- Developed a company-wide **loyalty platform** enabling staff to earn and redeem rewards through internal activities.
- Built a **CMS** for administrators to manage users, events, points, stock, and redemption workflows.
- Implemented analytics dashboards to visualize user engagement and redemption trends.
- Conducted internal knowledge-sharing sessions on **Feature Flags** and **OWASP fundamentals**.
- Published a Medium article reviewing my internship experience at Appsynth.
  Utilized: NextJS, Go, Gin, GORM, S3, Docker, One Signal, Mailgun, Slack, Jira, Confluence and Bitbucket

TECHNICAL PROJECTS

Personal Website: Website | Repository

watcher Website | Repository **Bangkok, Thailand**
Full-Stack Developer *February 2024 - February 2025*

- Developed a **PWA** for tracking watched content, discovering new media, and receiving personalized recommendations.
- Designed infrastructure using **Terraform on GCP**.
- Implemented a **GitOps-driven CI/CD pipeline** using ArgoCD (App-of-Apps pattern) on Kubernetes.
  Utilized: Next.js, MongoDB, Cloudflare, Kubernetes, Kubeseal, Kustomize, Helm, ArgoCD, GCP, Terraform and Github Actions

ZideQuest Repository **Bangkok, Thailand**
Backend Developer & Team Leader *July 2023 - October 2023*

- Led a 4-member team to develop the backend for a university mobile application supporting student activity engagement.
- Designed APIs, database schema, authentication, notifications, file storage, and cloud deployment.
- Integrated **Google Maps API** and implemented end-to-end testing.
- **Utilized:** React Native, Express, MongoDB, Google Map API, Cloudinary, AWS (EC2) and Docker

LEADERSHIP

International School of Engineering, Chulalongkorn University **Bangkok, Thailand**
I-Squared Hackathon 2025 (Image Processing Hackathon) *February 2025*

- Developed a Machine Learning model with image processing capabilities to classify motorcycle types and identify companies or services (e.g., Grab, Lineman, Motorbike Taxi) operating on Bangkok's sidewalks.
- Achieved ~98% model accuracy, contributing to innovative solutions for pedestrian safety.

Faculty of Engineering, Kasetsart University **Bangkok, Thailand**
Computer Programming Teacher Assistant *January 2025 - Present*

- Guided and supported over 60 undergraduate students in the programming fundamentals.

Medium Article **Bangkok, Thailand**
Author medium.com/@kitsugarr *September 2023 - Present*

- Write articles for software developers and computer enthusiasts, attracting 100+ monthly readers.
- Published articles covering Go API development, file systems, web security, memory management, and internship experiences

SKILLS

- **Languages:** Golang, C#, Python, JavaScript, TypeScript, SQL, NoSQL, HTML, CSS, YAML, Terraform
- **Frontend Frameworks & Library**: ReactJS, Angular, NextJS, TailwindCSS, Material UI, Ant Design, shadcn, Redux
- **Backend Framework & Library:** Gin, Fiber, Express, .NET
- **Technologies & Tools:** Docker, Kubernetes, ArgoCD, Ansible, Helm, Kustomize, Nginx, Vim, Postman
- **Version Control:** GitHub, Bitbucket
- **Cloud Services:** Azure, GCP, Cloudinary
